

# BRADEN®

A PACCAR COMPANY

## Planetary Swing Drive

The compact and durable Braden SD Planetary Swing Drive offers superior performance in a wide range of cost-effective configurations that provide turnkey power solutions for utility and construction applications.

### Features

- 20,000–110,000 lb-in. (2,260–12,428 N·m output torque range)
- Standard SAE motor mounting flanges/input shafts
- Static/dynamic brake options
- Heat-treated alloy steel ring gear
- High-strength pinion
- Heavy-duty bearing design
- Optional eccentric ring for gear backlash adjustment
- Optional LoadSense system (select models)

### Benefits

- Readily available torque and motor options
- Robust side-load capacity
- Low-decibel operation
- Long-lasting, reliable performance
- Designed for minimal backlash
