

## Characteristics

- Type:  
planetary
  - Shaft orientation:  
coaxial
  - Performance:  
for heavy loads
  - Other characteristics:  
for shafts
- 
- Torque:  
8,474 Nm, 13,558  
Nm (6,250.1017  
ft.lb)

## Description

### Product Features

Heavy duty tapered roller bearings on output shaft  
Spring-applied, hydraulically released brake or caliper brake  
High efficiency planetary gearing  
Available in pinion up or down models  
Multiple input and output options
