

Characteristics

- Type:
worm
 - Shaft orientation:
orthogonal
 - Performance:
for heavy loads
 - Other characteristics:
for heavy-duty applications
-
- Torque:
2,485 Nm
(1,832.8419 ft.lb)

Description

Product Features

- * Manufactured from ductile iron with bronze gearing
- * Worm is heat treated, machined, ground and polished
- * Worm shafts are mounted on heavy duty bearings
- * Available in upright, low and flange mount configurations
